Summary

- Software Engineer with 3+ years of experience developing enterprise web applications using Angular, .NET Core Web API, C#, and MS SQL Server.
- Experienced in building scalable business applications, RESTful APIs, authentication systems, dynamic forms, and database-driven solutions.
- Strong expertise in Angular, TypeScript, Entity Framework Core, SQL optimization, JWT authentication, and software design principles.

Experience

- | | |
|---|-------------------------------------|
| Software Developer
Penguin Data Centre Pvt Ltd | Jan 2025 – Aug 2026
Kochi, India |
| <ul style="list-style-type: none">– Developing and maintaining web applications for the travel and aviation industry, including PenAir and PenIBE, using Angular, .NET Core Web API, and MS SQL Server.– Implemented PenAir modules for travel agency operations including folder searching, PNR-based booking updates (Dreamlake and Lime providers).– Developed PenIBE flight booking engine features including flight search, search result listing, More Flights functionality, booking order management, and PNR-based booking retrieval integrated with Amadeus, Sabre, and Air Arabia.– Built responsive and user-friendly interfaces using Angular, HTML, and CSS for booking and agency management platforms.– Contributed to frontend development, API integration, database management, and application enhancements across scalable travel solutions. | |
| Software Engineer
AppRocker Technologies | Dec 2022 – Oct 2024
Kochi, India |
| <ul style="list-style-type: none">– Developed and maintained enterprise web applications using Angular, .NET Core Web API, C#, Entity Framework Core, and MS SQL Server.– Implemented dynamic forms and workflow modules using Angular Reactive Forms and RxJS for improved maintainability.– Engineered secure JWT-based authentication and role-based access control mechanisms.– Automated PDF document generation and reporting workflows, reducing manual effort and improving operational efficiency.– Optimized SQL queries and Entity Framework operations, improving application performance and reducing retrieval times.– Collaborated with cross-functional teams through Git workflows, code reviews, and Agile development practices. | |
| MEARN Stack Developer Intern
Luminar Technolab | Jun 2022 – Oct 2022
Kochi, India |
| <ul style="list-style-type: none">– Built full-stack applications using MongoDB, Express.js, Angular, React, and Node.js.– Developed RESTful APIs and integrated frontend applications with backend services.– Improved application performance through query optimization and efficient code design.– Collaborated with developers to build and deploy scalable web applications. | |

Projects

- PenAir – Travel Agency Management Solution
- Maintained and enhanced a travel agency management application for bookings, customer records, and operational workflows.
 - Integrated PNR-based booking update functionality with Dreamlake and Lime providers using RESTful APIs.
 - Created folder search, booking management, and PNR update features using Angular.
 - Enhanced commission management modules for Staff, Branch, and Affiliate workflows.
 - Optimized SQL queries to improve application performance and data retrieval.
- PenIBE – Flight Booking Engine
- Built responsive user interfaces for a flight booking application using Angular.
 - Delivered flight search, search results, More Flights, booking order management, and PNR retrieval features.
 - Connected frontend modules with RESTful APIs to support flight search and booking workflows.
 - Crafted reusable Angular components to improve maintainability and responsiveness.

- Collaborated with backend developers to integrate airline provider services, including Amadeus, Sabre, and Air Arabia.

EventZet – Event Management System

- Developed an event management platform for event creation, attendee registration, ticket booking, and volunteer management.
- Implemented RESTful API integration and JWT-based authentication.
- Designed responsive user interfaces using Angular.
- Managed database operations using Entity Framework Core and SQL Server.
- Worked closely with the development team to deliver scalable web applications.

Technical Skills

Languages: C#, TypeScript, JavaScript, SQL

Frontend: Angular, RxJS, NgRx, HTML5, CSS3, Bootstrap

Backend: .NET Core Web API, ASP.NET Core

Database: MS SQL Server

ORM: Entity Framework Core

Querying: LINQ

Authentication: JWT Authentication

Tools: Visual Studio, Visual Studio Code, Postman, Git, Source Tree, Bitbucket

Concepts: REST API Development, Object-Oriented Programming, Data Structures and Algorithms, Reactive Programming, Database Optimization, Agile Development

Education

University of Calicut
Bachelor of Science in Computer Science

Kerala, India
2019 – 2022
